

# INFEEED SEWING MACHINE

- ✓ High reliability
- ✓ Durable construction
- ✓ System integration
- ✓ Customizable
- ✓ Low maintenance

## Description

The Automatic Bag Infeed Unit automatically guides filled bags into the sewing machine, ensuring smooth, accurate, and consistent bag closing. It eliminates manual handling, reduces operator fatigue, and integrates seamlessly with automatic sewing systems for high-speed, high-capacity operations.

- Automatic infeed and bag top trimming device for crepe-tape bound closure on paper bags. Applicable to factories of grains, feedstuff, chemical, coffee beans, and etc.
- Photo-electric start binding, stitching, paper tape snipping and thread cutting can be finished automatically.
- Designed for automatic production line with auto-ration filling machine and conveyor.
