Up to  
**25**  
Bags per  
hour

- ✓ High reliability
- ✓ Durable construction
- ✓ System integration
- ✓ Customizable
- ✓ Low maintenance

## Description

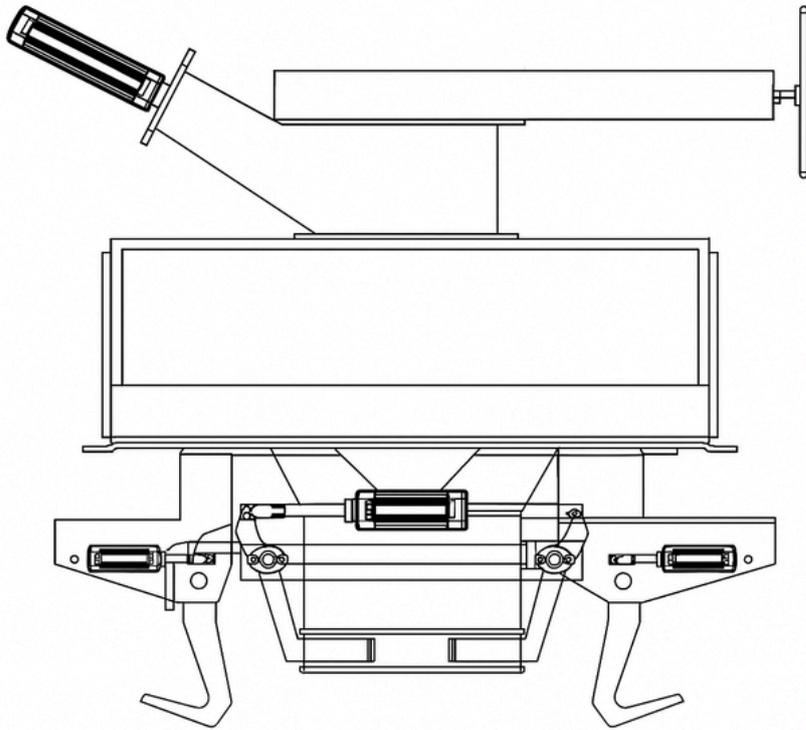

The Jumbo Bag Bagging Machine is an industrial-scale packaging system designed for filling large bulk bags (500 kg – 2000 kg) with high accuracy and efficiency. It is ideal for industries handling bulk powders, granules, or pellets such as fertilizer, cement, minerals, animal feed, and chemicals.

## Weigher type

- Net Weigher : The material is pre-weighed in a hopper before being discharged into the bag. This ensures higher speed and accuracy for high-capacity operations.
- Gross Weigher : The material is weighed directly inside the bag, offering a more compact design and simpler operation for medium-speed applications.

## JUMBO GROSS WEIGHING

### Optional

- Check weigher back top printer
- Stainless steel or Carbon steel
- Dust collector
- Infeed bag closing
- Air compressor (water & oil free)

Dimension	<b>W: 2.000 L: 3.100 H: 4.800 (include structure hopper)</b>
Capacity	<b>20 - 25 bag/ hour</b>
Bag placing	<b>Semi automatic</b>
Bag type	<b>Pillow bag gusseted bag</b>
Filling weight	<b>25 - 50 KG</b>
Air pressure	<b>6 - 8 bar</b>
Power supply	<b>220 - 380 / 480 VAC, 50 /60 HZ</b>
